

The mandate of the **BC Clinical Genomics Network** (BCCGN) is to advance the use of state-of-the-art genomic technology by BC clinicians for research studies that will ultimately benefit their patients. We are currently gathering information about databases in BC, which have accumulated or are accumulating large patient datasets. We are doing this so that we can provide the following free support services to the research community in BC.

- Web based summary of the genetic and clinical projects performed by BC investigators
- Connections to other researchers with data sets in your field of interest
- Assistance with study design for new research collaborations using the datasets
- Help performing complex data analysis for studies using the datasets
- Possible financial support for new studies aligned with BCCGN's mandate

In this way we hope to facilitate further collaboration and networking within the community of clinical researchers in BC.

In order to include your information, please enter details about your study on the table below and return this form to us by fax or email. We would also like to have your permission to include this information on our website.

| # | Name | Department | Telephone |
|---|------|------------|-----------|
| 1 |      |            |           |
| 2 |      |            |           |
| 3 |      |            |           |

| # | Study Title | Number and gender of participants | Design of study | Duration of study (start-end) |
|---|-------------|-----------------------------------|-----------------|-------------------------------|
| 1 |             |                                   |                 |                               |
| 2 |             |                                   |                 |                               |
| 3 |             |                                   |                 |                               |

| # | Disease / Phenotype being studied | Blood sample available (Yes/No) | DNA available (Yes/No) | Genotype Platform |
|---|-----------------------------------|---------------------------------|------------------------|-------------------|
| 1 |                                   |                                 |                        |                   |
| 2 |                                   |                                 |                        |                   |
| 3 |                                   |                                 |                        |                   |

Please feel free to contact us if you have any questions. Thank you in advance for your time,

BC Clinical Genomics Network
